Travis Aerenson

Taerenson.github.io * 302-690-7030 * Taerenso@uwyo.edu

Education

University of Washington, Seattle, WA
Dec 2023
PhD, Atmospheric Sciences
Dissertation Title: Cloud Changes in Climate Models: Response to Solar and CO2 Forcing and the Relationship between Model Bias and Feedbacks

University of Washington, Seattle, WA
May 2021
Master of Science, Atmospheric Sciences
Thesis Title: When Will MISR Detect Rising High Clouds?

Colorado College, Colorado Springs, CO
May 2019
Bachelor of Arts, Physics

Research Experience

Associate Research Scientist **U Wyoming Department of Atmospheric Science, Laramie WY** *Oct 2025-Present*

Postdoctoral Scholar **U Wyoming Department of Atmospheric Science, Laramie WY** *Jan 2024-Oct 2025*

Research Assistant, **U Washington Department of Atmospheric Sciences, Seattle WA**
- Advised by Dr. Roger Marchand *Aug 2019-Dec 2023*

Research Intern, **National Center for Atmospheric Research, Boulder CO** *Jun -Aug 2018*

Research Intern, **National Center for Atmospheric Research, Boulder CO** *Jun -Aug 2017*

Teaching Experience

Guest Lecturer, **UWyo Department of Atmospheric Science, Laramie WY** *Oct 2024-Present*
- ATSC 2100: Global Warming: The Science of Humankind's Energy Consumption Impacting Climate
- ATSC 5040: Global Physical Climatology

Teaching Assistant, **UW Department of Atmospheric Sciences, Seattle WA** *Mar 2021-Jun 2021*
- ATM S 100: Climate Justice & Energy Solutions

Quantitative Reasoning Center Math and Physics tutor, **Colorado College, Colorado Springs CO** *Mar 2017-May 2019*

Publications

In prep:
Aerenson, T., McCoy, D., Nugent, J., Brown, H., & Schlaff, G.: Convective vs large scale precipitation: how distinct processes in models combine to set precipitation intensity. *Journal of Climate*

Werapitiya, G., **Aerenson, T.**, McCoy, D., Brient, F., Elsaesser, G., Song, C., & Zelinka, M.: How the hydrological cycle shapes global cloud feedback. *PNAS*

In review:
Aerenson, T., McCoy, D., Keys, P., & Caulton, D.: Precipitation over the Contiguous United States is coming from farther away than in the past. *Geophysical Research Letters*

Grants and Proposals

Funding Agency: Department of Energy Established Program to Stimulate Competitive Research (DOE-EPSCoR)
Role: Co-I
Status: *Selected*
Title: Creating the framework for the next generation Energy Exascale Earth System Model (E3SM) at PROCEED (Perturbed physics ensemble Regression Optimization Center for ESM Evaluation and Development)
Amount Requested: $3M

Funding Agency: NASA Research Opportunities in Space and Earth Science (ROSES) (2024)
Role: PI
Status: *Not selected*
Title: Snow Energetics and SWE in the SnowEx Campaigns and Models (SESSCaM)
Amount Requested: $730,813

Service

Service Positions:

Postdoc Representative, **UWyo Department of Atmospheric Science, Laramie, WY.**
Oct 2024 – Present

Strategic Planning Committee Member, **UWyo Department of Atmospheric Science, Laramie, WY.**
May – Sep 2025

Peer-to-peer Mentoring Coordinator, **UW Department of Atmospheric Sciences, Seattle WA.**
Jul 2022 – Dec 2023

Diversity and Inclusion Group Coordinator, **UW Department of Atmospheric Sciences, Seattle WA.**
Jul 2021 – Mar 2023

Campus Sustainability Fund Intersectional Sustainability Board, **University of Washington, Seattle WA.**
Aug – Oct 2020

Service Activities:

Panelist for University of Washington College of the Environment Pathways to Postdoc Panel Discussion *Nov 2025*

Panelist for University of Wyoming College of Engineering and Physical Sciences Graduate Program Panel *Sep 2024*

Refereed Manuscripts for the Following Journals: *Journal of Geophysical Research: Atmospheres, JAMES, PLOS ONE, Atmospheric Chemistry and Physics (ACP), Earth and Space Science, Nature: Communications Earth and Environment, Geophysical Research Letters (GRL), Nature Communications, Journal of Geophysical Research: Machine Learning and Computation, Environmental Research Communications*

Reviewed Proposals for the Following Programs: *NASA Postdoctoral Program (NPP): Earth Science, NASA Postdoctoral Program (NPP): Technology Development*

Scientific Presentations

Travis Aerenson

Taerenson.github.io * 302-690-7030 * Taerenso@uwyo.edu

Aerenson, T. 2026: "Moisture Transport, Precipitation, and Snowpack: what global models tell us about the water cycle and how it is changing" Florida State University Department of Earth, Ocean, and Atmospheric Science, Tallahassee FL. *Invited Seminar*

Aerenson, T. 2025: "Remote causes of extreme precipitation in the Western US" AGU Fall Meeting, New Orleans, LA. *Poster*

Aerenson, T., Barahona, D., McCoy, D. 2025: "Cloud adiabaticity and droplet size distribution cause bias in spaceborne cloud droplet number concentration retrieval." AGU Fall Meeting, New Orleans, LA. *Poster*

Aerenson, T. 2025: "Snowpack and atmospheric moisture transport: how the water cycle is changing in a warming world." University of Wyoming Department of Atmospheric Science Seminar, Laramie, WY. *Seminar*

Aerenson, T., D. McCoy, G. Elsaesser, J. Wu, J. Nugent, H. Brown, M. Zelinka, S. Burrows 2025: "Are we simulating clouds at the wrong time of day?" Gordon Research Conference on Radiation and Climate, Lewiston, ME. *Poster*

Aerenson, T., D. McCoy, G. Elsaesser, J. Wu, J. Nugent, H. Brown, M. Zelinka, S. Burrows 2025: "Are we simulating clouds at the wrong time of day?" Gordon Research Seminar on Radiation and Climate, Lewiston, ME. *Oral*

Aerenson, T., R. Marchand, T. Ackerman 2024: "MISR Observed Trends in Cloud Top Height and Constraints on High Cloud Altitude Feedbacks" AGU Fall Meeting: Terra: 25 Years of the Earth Observing System Flagship Observatory, Washington, DC. *Poster*

Aerenson, T., D. McCoy, G. Elsaesser 2024: "Causes of Model Spread in Predictions of Hydroclimate in the Mountain West" AGU Fall Meeting: Hydroclimate and Extremes in the Western United States in a Changing Climate, Washington, DC. *Poster*

Aerenson, T., D. McCoy 2024: "How Much Does the Cloud Diurnal Cycle Impact SWCRE?" Micro2Macro Origins of Climate Change Uncertainty Workshop, Laramie, WY. *Poster*

Aerenson, T., D. McCoy, G. Elsaesser 2024: "How Might we Improve Predictions of Regional Hydroclimate" Oxford Workshop on Model Uncertainty, Oxford, UK. *Oral*

Aerenson, T., D. McCoy, G. Elsaesser 2024: "Can We Do Better at Predicting Regional Hydroclimate" CESM Workshop, Boulder, CO. *Oral*

Aerenson, T. 2023: "The Relationship Between Simulated Present-Day Cloud Attributes and Cloud Feedbacks" University of Washington Department of Atmospheric Sciences Colloquium, Seattle, WA. *PhD Defense*

Aerenson, T., R. Marchand, C. Zhou 2023: "Cloud Adjustments to Solar and CO2 Forcing in Coupled Models" CFMIP Meeting, Paris, FR. *Poster*

Aerenson, T., R. Marchand 2023: "The Contribution of Mean-State Bias to Cloud Feedbacks in Climate Models" CFMIP Meeting, Paris, FR. *Poster*

Aerenson, T., R. Marchand 2023: "The Contribution of Mean-State Bias to Cloud Feedbacks in Climate Models" University of Wyoming Department of Atmospheric Science Seminar, Laramie, WY. *Invited Seminar*

Aerenson, T., R. Marchand 2023: "Using ISCCP and MISR Satellite Simulators to Understand Cloud Feedbacks" NASA GSFC CPC Seminar, Greenbelt, MD. *Virtual Invited Seminar*

Aerenson, T., R. Marchand, C. Zhou 2022: "Cloud Response to Abrupt Changes in Solar Forcing and CO_2 Concentrations" AGU Fall Meeting: Advances in Solar Radiation Modification Research, Chicago, IL. *Poster*

Aerenson, T., R. Marchand, C. Zhou 2022: "Cloud Response to Abrupt Changes in Solar Forcing and CO_2 Concentration" University of Washington Department of Atmospheric Sciences Seminar on Atmospheric Physics and Chemistry, Seattle, WA. *seminar*

Aerenson, T., R. Marchand 2022: "Cloud Response to Abrupt Changes in Solar Forcing and CO_2 Concentrations" CFMIP Meeting: Cloud Processes and Radiative Feedbacks, Seattle, WA. *Oral*

Aerenson, T. 2021: "Cloud Rapid Adjustments and Feedbacks to Abrupt Changes in Solar and CO_2 Induced Forcings" AGU Fall Meeting: Advances in Climate Engineering Research. *Virtual Poster*

Aerenson, T., R. Marchand 2021: "Cloud Rapid Adjustments and Feedbacks to Abrupt Changes in Solar and CO_2 Induced Forcing" CFMIP Meeting. *Virtual Poster*

Aerenson, T. 2021: "When Will MISR Detect Rising High Clouds?" University of Washington Department of Atmospheric Sciences Physics and Chemistry Seminar. *Virtual Seminar*

Aerenson, T., R. Marchand 2021: "Time of Emergence: When Will We See High Clouds Get Higher?" AMS Annual Meeting. *Remote oral presentation and discussion session*

Aerenson, T., R. Marchand, 2020: "Time of Emergence: When do Climate Models Predict Rising Cloud-Top-Height (CTH) Should be Detected by MISR?" CFMIP Meeting on Clouds, Precipitation, and Climate Sensitivity. *Remote submitted slide and discussion session*

Aerenson, T., R. Marchand, 2020: "When will we see high clouds get higher?" MISR Science Team Meeting, Pasadena, CA. *Oral*

Aerenson, T., 2019: "Climate Models and Climate Change Reversibility" Colorado College Physics Department Senior Seminar Series, Colorado Springs, CO. *Seminar*

Aerenson, T., C. Tebaldi, B. Sanderson, J.F. Lamarque, 2017: "Climate Extremes in Low Warming Scenarios" NCAR CGD Integrated Assessment Modelling Weekly Meeting, Boulder, CO. *Oral*

Scholarships and Awards

Certificate of Distinguished Service 2022: University of Washington Department of Atmospheric Sciences

Top Scholar Award 2019: University of Washington Department of Atmospheric Sciences
